PROFESSIONAL PSYCHOLOGICAL SERVICES

PASTORAL AND CHURCH CONSULTATION SERVICES*

Did you know that as licensed psychologists who conduct our professional services from a position of faith, we offer so much more than just clinical services?

In research conducted in 2003 (Lish, McMinn, et al, Journal of Psychology and Christianity) we found that many pastors and churches were unaware of the diversity among a Christian psychologist's professional services. Yet, when asked many indicated that they would welcome the opportunity to have a Christian psychologist partner with them in pastoral and church ministry.

We feel that we are uniquely positioned to partner with pastors and come along side of churches as they provide ministry services to our broken world.

* also adaptable for small Christian businesses

What we do:

- We can consult with you and/or your ministry team and assist you in your **pastoral care ministry**.
- We can **train your ministry team** in effective pastoral counseling methods.
- We can assess and consult with you and/or your ministry team about ways that impact **congregational care ministries**.
- We can **assist you to build an effective team**, one that utilizes and celebrates individual talents and personalities, while enhancing connectedness and a shared vision.
- We can **provide pastoral coaching** in support of a pastor's vision and passions about their ministry goals.
- We offer **leadership assessments** to help a search committee or a pastor maximize the best fit between a minister's personality and skills, and the ministry demands they are asked to fulfill.
- We can help you **conduct a needs assessment** to maximize the impact of a new ministry or to refocus an existing ministry.
- We can **listen to your or your team's heart**. Many times a pastor or a ministry team just needs to verbalize and dream with someone about any number of ministry efforts.
